

## YOUR FRAME DESIGN - ACCORDING TO YOUR WISHES

● INTEC's emblem on the head tube  
Color: black or silver

+

● INTEC lettering on the down tube  
Color: black or silver

+ INTEC

+ INTEC

Our label is placed above the  
bottom bracket on every  
INTEC frame  
Color: black or silver

INTEC frames can be decorated with the INTEC logo on the head tube and the writing on the down tube. Do you want to finish your frame with a custom lettering or a unique logo? No problem! We use high-performance, scratch-resistant, transparent adhesive films for this. Got any further ideas to customize your frame? We are happy to help!

The INTEC logo above the bottom bracket shell is always placed, no matter if INTEC decor or own decor.

Customised label  
according to customer's require-  
ments and wishes possible  
on the top, down or head tube

# WE COLOR UP YOU'R BIKE

With their sparkling colours our INTEC bikes stand out everywhere!

Our frames can be painted in a rich range of RAL colours, with matt, glossy finish or a metallic effect. To achieve these effects we collaborate with well-known experts specialized in powder coating.

The paint, which is in the form of fine particles, is applied to the frame tubes using the "electrostatic painting" technique, so defined because the powder paint particles are nebulized and positively electrostatically charged on the frame, which in turn has been negatively charged: the negative charge attracts the paint like a magnet. Unlike conventional painting techniques, which can leave some corners uncovered, this fabulous electroplating technique allows us to coat the frame with a 100% covering resin film.
