Steel frame - timeless and comfortable

With discreet tube diameters and the "natural" damping properties of steel, we build timeless, comfortable and durable bicycles! The chrome-molybdenum steel used for the Double Butted tubes, often also known as CrMo or Chromoly, offers the best technical properties and our bicycle frames are also absolutely competitive when it comes to weight. All frames are phosphated in Germany for corrosion protection and then powder-coated twice with high-quality polyester powder.

We color up your bike

In addition to our standard and special colours, our frames can be coated in many RAL colours, whether matt or glossy.

For this purpose, we work together with renowned specialists for powder coating. The paint is applied to the tubes as a plastic powder. Frame and powder are electrostatically charged in opposite directions and exert a magical attraction on each other. As a result, the powder is distributed more evenly than with conventional lacquering, even in corners and angles.

Due to different monitor settings or printing results, there may be deviations in the colour representation. We will be happy to advise you!

Standard Colors

Deep Black RAL 9005 Matt or Glossy
Basalt-Grey RAL 7012
Blue Ultra Pearl Metallic
British Racing Green

Special Colors

Dormant Night Blue
Dormant Violett
Dormant Fire Red
Dormant Arabic Red

RAL Colors

matt or glossy
(Attention: Luminous colours (neon) are not UV-stable)

We use only the best components

With our modular system you have the possibility to assemble your own bike. Just choose one of our bike models and you can start.

When configuring, you have many inspiring choices at your disposal. According to your wishes, the saddle, tyres, handles, lighting and many other details can be colour-matched and ergonomically adjusted in such a way that the end result is a bike that fits you 100%!

The components used by well-known manufacturers meet the highest quality standards and are tailored to the needs of our customers through many years of experience.

Your design - according to your wishes

INTEC frames are decorated with the INTEC emblem on the head tube and the lettering on the down tube.

Do you want to finish your frame with individual lettering or a logo? No problem for us! You don't have any ideas for your own decor yet? We are happy to help you with the realisation of your wishes. e-mail: stefan.degenhart@ra-co.de

NEW F011 STEIGER

A gravel bike has to be tested off-road, far away from asphalt and roads. Here in Erfurt, this is best done in our city forest - the Steiger. So it was obvious to give our new bike, which had mastered its first test rides in the city forest, the name F11 Steiger.

- Steel frame with thru axle
- innovative frame geometry
- long wheelbase
- tyre clearance up to 42 mm width
- threaded loops on frame and fork for mudguards & luggage racks
- Gear set: SHIMANO 105s & GRX
- Available frame heights:
480 | 510 | 540 | 570 | 600 | 630 mm
- Reynolds 631 tube set

T09 / T010

CITY / TREKKING

About T09

The robust bike in sporty design meets all requirements of demanding cyclists. An absolute plus point: with the optionally selectable Gates Carbon Drive belt, the time of oil stains on clothing, permanent chain lubrication or chain rustling is over. The proven trekking model paired with a Rohloff gear hub and the Gates belt drive make it a low-wear and low-maintenance companion.

About T010

In sportive design this bike sets new benchmarks with regard to wear and maintenance. It follows you everywhere and makes you look good. Time of oil patches, permanent chain lubrication and chain rustling is over. Paired with Rohloff gear hub and Gates belt drive make it a low-wear and low-maintenance companion.

M05 / M06

MTB / TREKKING

About M05

A bike for all situations: whether in everyday life, sports, offroad or on extended tours. High comfort, more traction through 29" wheels and 50-60 mm tires, high-quality components, adjustable rears and better rolling characteristics guarantee the M05 simply fun on any terrain, even under extreme loads!

About M06

For a new driving experience! Developed especially for Pinion bottom bracket, the M06 convinces through optimal weight allocation. By a low-maintenance and low-wear shift, high durability without permanent adjustments is guaranteed. Broader tyres provide more traction, improved unrolling and superior directional stability. Chain drive or belt drive is selectable. In addition upgrading with carriers, lights and disc brakes is possible.

**„Wer immer das Fahrrad

About M01

A symbiosis of speed and elegance! With its compact construction and its 26" wheels, this bike is very agile and excellent steerable. Versatile mounting points at fork and frame offer a lot of storage space and provide for optimal weight allocation, also by heavy-weight baggage. With an extra huge ground clearance high driving comfort is guaranteed, even in pathless terrain.

About F010 Urban

For everyday's life! The Urban is the perfect version of the F010 range for everyday usage. It unifies the speed of a road bike and the seating comfort of a trekking bike to guarantee plenty of driving pleasure. On the way to work as well as on the way to the restaurant. A straight handlebar, lights and disc brakes provide a tremendous agility to guide the bike easily through the street traffic.

Color

About F010 Klassik

Classic meets sport! The Klassik is the sportive version of the F010 range. Race handlebar, an athletic seat position, race wheel set, disc brakes, straight legs of the fork and chain stays emphasizes its character. Moreover, it is possible to mount mud guards, carrier and lights to make this bike the perfect companion for travelling or everyday usage.

F010 RANDONNEUR

TREKKING

About F010 Randonneur

For long-distance cyclists and all those who love to travel at a sporty speed.

On our F010 have already moved the first globetrotters and many are still convinced of the specific travel bike properties. But not only for cyclists who are drawn to the wide world this bike is perfect but also for cyclists in the city who love the fast multifunctional aspects. A perfect composition of comfort, sportiness, toughness and durability. With its road bike geometry and racing handlebars, our Randonneur is absolutely suitable for touring. Front and rear rack eyelets, fender mounts and 2 bottle cages complete the bike. For a good rolling performance provide 28 inch wheels with slim tires.

P01 / F01

RACE

About P01

The P01 is a professional track bike with diamond frame geometry. It is designed as an allrounder for training & competition. It does not matter, if the chosen discipline is race, Madison or sprint. It can be optimally adapted to the requirements of the respective competition with the adjustments to the stem, handlebar, gear ratio and crank length. The installed Miche Track groupset is unbeatable in terms of price | performance and represents a real alternative compared to the "known" manufacturers. The optionally offered parts saddle and wheel complete this wheel.

About F01

The classic road bike! If you love timeless road bikes, the F01 is the right choice for you. Light-weight alloy frame in sloping geometry, Shimano 105 R7000 group set in connection with racing wheels and race handlebar are the basics for this high quality road bike.

About F08

The smallest in the INTEC range
Our F08 is ideal for children who want to ride on the road or maybe even races. Parents who invest in an INTEC F08 road bike are investing in a wonderful hobby and ultimately in their child's passion. A lightweight road bike in the right size can help children get excited about road cycling. And who knows, maybe the next champion will have discovered bike racing for themselves with an INTEC F08.
