We use only the best components!

With our modular system you have the possibility to assemble your own bike. Just choose one of our bike models and you can start. When configuring, you have many inspiring choices at your disposal. According to your wishes, the saddle, tyres, handles, lighting and many other details can be colour-matched and ergonomically adjusted in such a way that the end result is a bike that fits you 100%! The components used by well-known manufacturers meet the highest quality standards and are tailored to the needs of our customers through many years of experience.

MADE IN ERFURT

Since 2008 we manufacture unique bikes in individual, sporty timeless design

ABOUT INTEC:

Do you want to ride off-road on gravel trails, a sporty bike for long road tours, a perfect companion for your daily commutes in the city? We have the right bike for every requirement. All INTEC bikes are assembled by professional mechanics. We have the right bike for every requirement.

All INTEC bikes are assembled by professional by experienced mechanics and are completely handmade in Erfurt.

With INTEC you get individuality, because you specify the frame colour, which components are used and even the frame decor can be individually designed by you.

F011 Steiger

GRAVEL

A gravel bike has to be tested off-road, far away from asphalt and roads. Here in Erfurt, this is best done in our city forest - the Steiger. So it was obvious to give our new bike, which had mastered its first test rides in the city forest, the name F11 Steiger.

Steel frame - timeless and comfortable

With discreet tube diameters and the "natural" damping properties of steel, we build timeless, comfortable and durable bicycles! The chrome-molybdenum steel used for the Double Butted tubes, often also known as CrMo or Chromoly, offers the best technical properties and our bicycle frames are also absolutely competitive when it comes to weight. All frames are phosphated in Germany for corrosion protection and then powder-coated twice with high-quality polyester powder.

We color up your bike

In addition to our standard and special colours, our frames can be coated in many RAL colours, whether matt or glossy.

For this purpose, we work together with renowned specialists for powder coating. The paint is applied to the tubes as a plastic powder. Frame and powder are electrostatically charged in opposite directions and exert a magical attraction on each other. As a result, the powder is distributed more evenly than with conventional lacquering, even in corners and angles.

Due to different monitor settings or printing results, there may be deviations in the colour representation. We will be happy to advise you!

Your design - according to your wishes

INTEC frames are decorated with the INTEC emblem on the head tube and the lettering on the down tube.

Do you want to finish your frame with individual lettering or a logo? No problem for us! You don't have any ideas for your own decor yet? We are happy to help you with the realisation of your wishes. e-mail: stefan.degenhart@ra-co.de

About F010 Urban

For everyday's life! The Urban is the perfect version of the F010 range for everyday usage. It unifies the speed of a road bike and the seating comfort of a trekking bike to guarantee plenty of driving pleasure. On the way to work as well as on the way to the restaurant. A straight handlebar, lights and disc brakes provide a tremendous agility to guide the bike easily through the street traffic.

For long-distance cyclists and all those who love to travel at a sporty speed.

On our F010 have already moved the first globetrotters and many are still convinced of the specific travel bike properties. But not only for cyclists who are drawn to the wide world this bike is perfect but also for cyclists in the city who love the fast multifunctional aspects.

About F010 Klassik

Classic meets sport! The Klassik is the sportive version of the F010 range. Race handlebar, an athletic seat position, race wheel set, disc brakes, straight legs of the fork and chain stays emphasizes its character. Moreover, it is possible to mount mud guards, carrier and lights to make this bike the perfect companion for travelling or everyday usage.
